

INDEX TO VOL. XIII.

A.

ACCLIMATING principle of plants, 267.
ACORNS, American, wanted in England, 207—presented by R. Harwood, of Thos., 263.
ACRE, of corn, a song, 95.
ADVERTISERS, of implements should state prices, 95.
AGAVE, Americana, its use in cordage, by Dr. James Mease, 274.
AGRICULTURAL Reports, extracts from the Essex Ag. society, 17. Education, notice of a proposed school, by F. A. Ismar, 55. From Doncaster Society, on bone manure, 129.
— Exhibition at Carthage, 148.
— Boards, propriety of establishing, by R. K. M., 1.
SOCIETY, Hamilton county, Ohio, Gen. W. H. Harrison's address before, 162—169. Address before the Hampshire, Hampden and Franklin, 313—321—330. Of India, requests seeds, &c., 335. Of the state of New York, 361.
— General, and Horticultural Establishment, prospectus of, 368.
AGRICULTURE, apathy in relation to improvement in, 26. In England, 375.
AGRICULTURISTS, a hint to, 335.
ALMOND TREE, its cultivation recommended, 4.
AMERICAN FARMER, approbatory letter concerning the management of, by W. B. M. 23. Close of the volume, 415.
AMERICAN FARMERS, prospects of, 55.
AMERICAN GRAPES, remarks on, by A., 252.
AMERICAN REPERTORY, notice of, 63.
ANIMALS, Physiology of, 134. Domestic, principles of breeding, by R. J. B., 27.
ANTS, Injurious effects of, in Peach trees, 165. Remedy for the red, 182. Camphor, a remedy for the red, 183.
APATHY, of farmers, relative to improvements, 412.
APPLE BUTTER, how prepared, 362. Sauce, how to make, 269.
APPLES of Sodom, 367.
— Portable apparatus for grinding and pressing, 398. Preserved in plaster of Paris, 118. To preserve, 143. And Pears, new seedlings, by J. B. Garber, 200. Second growth of, 288. Preserved in bran and sand, 317.
APPLE TREES, disease in, in Missouri, 404.
APRICOTS, fine ones, 135.
ARACACHA, sent to the Massachusetts horticultural society by G. B. Smith, 45, 47. And Quinoa, further notice of, 111, 175, 215, by John Lowell, ib., 280.
ASPARAGUS, error in cultivating, 36. Fall dressing of 302. Culture of, 364. Early, 398.

B.

BACON, curing, in Cincinnati, 54.
BAKEWELL SHEEP, by John Barney, 25.
BARBERRY, its effects on wheat, by D. Thomas, 386. Injurious to corn, (wheat) 412.
BARN, a Shaker one described, 166.
BARNITZ, C. A. notice of his Spring Dale Farm, 279.
BEANS, new ones, by the Editor, 159. Curious, 295. Culture and varieties of, 413.
BEAR, singular method of taking, 390.
BEDDING LAND, for corn, 381.
BEER, ginger, how to make, by An Ancient, 403.
BEETS, &c. how to preserve, 270.

BEES, security against the worm or moth, 29. New mode of keeping, 53, 77, 95. In cities, 70. To guard against the moth, 118. Watching their swarming, 158. An experiment with a hive, 166. Dried comb, a trap for the moth, 198. To preserve from insects, 278.
BENE PLANT, described, 173.
BERRY, Rev. H., proposes to breed short horned cattle for America, 255. His agricultural tour, 337. Prize essay of, on breeding cattle, 345, 353.
BIRDS, wanton practice of shooting, 77.
BLIGHT, in peach trees, treatment of, 278.
BOARDS, of Agriculture, on establishing by R. K. M. I.
BOLTON FARM, Fellenberg school at, 35.
BONE MANURE, abstract of the report of Doncaster Agricultural Society, 129.
BOOKS, agricultural, remarks on, 371.
BORER, oil a remedy for in trees, 60.
BOTANIC GARDEN, established at St. Mary's college, 151.
BOTANICAL MAGAZINE, by D. & C. Landreth, 198.
BOTANY, explanation of specific characters in, 93.
BOTS, in horses, bad treatment of, 254. New theory of, by Dr. R. R. Harden, 302, 303; by Agriculturist, 317; by the Editor, 319; by L. Cassen, 342; by Dr. R. R. Harden, 349; from Genesee Farmer, 351; by Agriculturist, 358; by the Editor, 359; by Peter Ellis, 388, 391; by A Spartan, 397; by the Editor, 398; by An Ancient, 403.
BOX, wood of, 61.
BREAD, from pumpkins, how to make, 309.
BREEDING, the horse, principles of, by R. J. B., 220. Stock for a dairy, 115. Horses, 318. Cattle, by Rev. H. Berry, 345, 353.
BRENT, William L., communicates a treatise on seine fishing by the late Col. Fenwick, 357.
BREWING, art of, 69.
BRODAITAIL SHEEP of Tunis, 35.
BUCKWHEAT, as green manure, 239.
BUDDING, method of, 127.
BUFFALOE BERRY, by J. Winship, 38.
BUTTER, method of making in winter, 77. On preparing for exportation, by C. Varie, 260.

C.

CABBAGE, turnip rooted, notice of several new kinds of, 175.
CACTUS GRANDIFLORA, in bloom at St. Mary's College, 151.
CALCARIOUS MANURES, (lime) 106.
CALENDAREAL ARRANGEMENT, of farm management for every month in the year, 193.
CAMPHOR, a remedy for red ants, 182.
CANE, grain of, 111.
CANKER, in fruit trees, 334.
CANNON, report of, destructive to goolins, 102.
CAPE BROCCOLI, culture of, 414.
CARD MACHINE, notice of, 328.
CARDS, for working cocoons, by Dr. Mease, 61.
CAROLINA, or the Planter, a poem, 22. Notice of, 24, 27, 37, 46, 54.
CARROTS, culture of, as food for cattle and horses, 5. How to preserve, 270.
CASTOR OIL, used in lamps, 207.
CATECHISM OF HEALTH, notice of, 183.
CATERPILLARS, the time to destroy, 214.
CATTLE, on feeding, 155. Working cattle, from Columella, 195. Fall feeding of, 293. Breed-

ing, by Rev. H. Berry, 345, 353. Breeds of, 377. Devon, by John Barney, 25. Pedigree and weight of a pair, fattened by S. & L. Hurlbut, 67. Short-horns, most profitable, 17. Management of, 70. Prize essay on, by J. Wright, of England, 121. Improved short-horns, testimony in favor of, 122. Hoven in, 124. Fat, in Connecticut, 335.
CATTLE SHOW, reports of the Worcester, 299.
CEMENT, for iron water pipes, 198.
CHARACTERS, and terms, botanical, definitions of, 386.
CHARLES-SHOPE, for sale, 152, 223.
CHEAT OR CHESS, on its being degenerated wheat, by D. T., 150; by the Editor, 231; by Tyro, 337; by the Editor, 343, by D. T. 361; from Timothy, 371; from York Co. Farmer, 378; by Dr. J. E. Muse, 385, 391; by B. F. & C., 395; by D. Thomas, 411.
CHEESE, GOURD, Spanish mode of dressing, 135.
CHEESE MAKING, 94. In America, defects of, 151. Answer to question on, 156.
CHENOPODIUM QUINOA, seed of, received by the Editor, 72. Notice and culture of, 78. Further notice of, 111.
CHEROKEE ROSE, inquiry concerning, 76. Culture of, as a hedge plant, by S. Elliott, 355.
CHERRY, of the Rocky Mountains, 356.
CHERRY TREE, black, poisonous, 112, 196. On plum stocks, 269. Leaves of the wild poisonous, 335.
CHESTER COUNTY, Pa., remarks on, 367.
CHILDREN, how to teach to tease, 102. Politeness in, 175.
CHINA RAW SILK, sale of, in Philadelphia, 61.
CHIRIMOYA, of Peru, notice of, 295.
CHLORIDE OF LIME, a remedy for disease in silk worms; of soda, method of using, 127. Destroys mildew, 300.
CIDER, in the North, Maryland, &c., 158. How to fine and bottle, 269.
CLEANING HOGS, French mode, by Master T. B. Skinner, 37.
CLEANLINESS, of insects, 287.
CLIMATE, difference of, on the eastern and western shores of the continent, 310. Influence of, on the fruitfulness of plants, 139.
CLOVER, experiments in its culture, 140. Seed, inquiry how to clean, 263. Culture of, 260. Burial's machine for cleaning the seed, 285, 287. To clean the seed, 321.
COBB, J. H., on mulberry trees, and silk, 415.
COCHINEAL, on its culture in Mexico, and its introduction to Florida, by H. Perrine, 406; by the Editor, 407.
COCOONS, market for, and mode of curing, 32. Cards for working, by Dr. Mease, 61.
COFFEE, effects of, on the stomach, 191. French preparation of, by Cousin Tabitha, 29.
COINS, assay on foreign gold and silver, 78.
COKE, Mr., of Norfolk, England, notice of, 184.
COLUMELLA, extracts from his works, by Re Rustica, 185, 195. On vineyards, 236.
COMFREY, prickly, inquiry for, 25.
COMPOST, new one for flowers, 141.
CONVENTION, agricultural, in New York, 359.
COOK GRAPE, from the rocky mountains, 396.
COOKS, advice to, 230.
COPPERAS, use of, on corn as a preventive of depredation from crows, 107, 120, 191.
CORDAGE, on the materials from which it is made, by Dr. James Mease, 273.
COORN, seed, steeped in copperas of no benefit, 120.

94-118-278
119794

INDEX.

- Green, produced by the Editor, 135. Cultivation of, by Arator, 275. For green feed, 290. Curious, 225. Cultivation of, Second Prize Essay, by John Stillwell, 337. Improvement of, by the Editor, 32, 183. Culture of, 59. Culture of, 75. On cultivating, by De Rustica, 82; by a Louisa farmer, 83. Culture of, 90. "Acre of corn," a song, 95. Culture of, 97. Corn and cowpeas in S. C., 100. Preparation of seed, 107. Cultivation of, 321. Planting of, 318. Culture of, 387.
- CORN MEAL, kiln dried, 374.
- CORN PUDDING, how to make, 254.
- CORN STALKS, food for horses, 215. As food for milch cows, 243, 290.
- COTTON, culture of, 105. Sea Island, origin of, 107. Planting, 113. "Culture of, 290. Singular growth of, 290. Peruvian, 324. Culture of, by Arator, 412.
- COTTON BAGGING, advice respecting, 191.
- COTTON GRASSES, cloth made from, 375.
- COTTON SEED, Smith's mill for extracting oil from, 31.
- COTTON SEED OIL, machinery for extracting, 143.
- COTTON SEED, food for cattle, 14. And stable manure, best mode of applying, 113.
- COUGH, in horses, slaked lime useful for, 398.
- COUSIN TABITHA, receipt for preparing coffee, 29. On thunder, fatal to goslings, 78. Recipe for sour kraut, 327. To powder red pepper, 351.
- COW, extraordinary produce of one, 63. Starvation of one, 175. Valuable one, 350. Produce of two, 286. Diminutive one, 376.
- COW PEAS, mode of culture, in S. C., 100. Remarks on, by W. G. Read, 212; by the Editor, 239; by a correspondent, 311.
- COWPEN, management of manure in, 99.
- COWSLIP, American, grows profusely on the banks of the Conestoga, 151.
- COWS, Ayshire breed of, introduced into Virginia, 405.
- COWS AND SHEEP, management of, &c., 21. Currying, 89.
- CREAM, improvement in producing, 134.
- CREDIT, omission to give, by Editors, 184.
- CRITICISM, severity of deprecated, 351.
- CROPS, summer, to prepare for, 59. The wheat, 71, 79. Of wheat, cotton, &c., in N. C., 111. Reports on, in Louisiana, 155. State of, in Mississippi, and Alabama, 284. Of Europe, 300. In the Scioto valley, 307.
- CURCULIO, notice of, by D. T., 260.
- CURRENT WINE, mode of making, 157.
- CURRYING COWS, 89.
- D.**
- DAHLIAS, description of, 13.
- DAIRY, account of Jesse Curtis', 82. Breeding stock for, 115. Remarks on, 227. Husbandry, 405.
- DAMPS IN WELLS, recovery from the effects of, 183.
- DATES, grown near Savannah, 91.
- DAVIS, Gideon, on tillage, prize essay, 369.
- DEBT, farmers advised to keep out of, 95.
- DEFINITIONS, of botanical terms and signs, by D. T., 388.
- DEVON CATTLE, by John Barney, 25. Pedigree and weight of a pair fattened by S. & L. Durbut, 67. Do. with cuts, 217.
- DICKINSON, W. K., death of, 247.
- DIGESTER, Papin's, notice of, 193.
- DISEASES, of sheep, 14. Of fruit trees, 165. In horses in Massachusetts, 246.
- DITCHING, improvement of low land by, 170.
- DODECATHEON, media, American cowslip, 191.
- DOG, sagacity of, in saving fowls, 111. Cure for the staggers in, 119.
- DOMESTIC ANIMALS, principles of breeding, 27.
- DONCASTER, Agricultural Society, report on bone manure, 129.
- DRAINING, land, mode and result of, 218.
- DUNGSTEAD, management of, 99.
- DU PONCEAU, P. S., letter from, on silk, 263.
- DUTIES, on sugar, remarks on, 270.
- DUTCHMAN'S breakfast, 71. Auctions, 78.
- E.**
- EGGS, of silk worms, &c. not injured by cold, 120, 135.
- ELDER, expressed juice of, destructive to insects, 149.
- ELEPHANTS, used in Ceylon for ploughing, 214.
- ELLIS, Peter, on bots in horses, 335.
- ELM TREE, new species, by D. Thomas, 308.
- ERGOT, of rye, description of, 78.
- ESSAYS, premiums offered for, 7. On agriculture, by F. A. Ismar, 55, 73, 89, 97. Decision on premiums deferred, 119, 187. Award of the committee, 343. Second prize, cultivation of corn, by John Stillwell, 337. First do. on horticulture, by D. Thomas, 369. Third do. agricultural, by Gideon Davis, 369. Second Horticultural, by John C. Short, 379. First, on agriculture, by R. K. Meade, 383, 401, 409.
- EVERGREENS, ornamental, description of, by D. T., 13.
- EXCHANGE PAPERS, notice to, 24.
- EXPERIMENTAL GARDEN, report on, by the Massachusetts Horticultural Society, 124, 127.
- F.**
- FARM, plan of operations of one, 275.
- FARMER, an active one, 291.
- FARMERS, American, prospects of, 55. Work for May, 59.
- FARMERS AND GRAZIERS' GUIDE, notice of, 375.
- FARMING UTENSILS, improved, 36.
- FARMS, produce of Pickman, by Erastus Ware, 17. Management of, 151. Reports of select, in England, 177, 186, 193, 201, 209, 218, 225, 233, 240, 249, 257. Manuring large ones, 246.
- FATTENING HOGS, with boiled food, 94.
- FEEDING CATTLE, remarks on, 155, 293.
- FELLENBERG, lectures on his institution at Hofwyl, by F. A. Ismar, 33, 41. Terms of the institution at Bolton farm, 85, 95. Remarks on his system, by R. K. Meade, 161. His management at Hofwyl, 235.
- FENWICK, the late Col. James, on seine fishing, 357, 365, 381, 383.
- FIGS, on forcing by means of oil, 180, 204. Culture of, 229. Grown in Philadelphia, 260. Rationale of the action of oil on the fig, 284.
- FISHING, with seines, treatise on, by the late Col. Fenwick, 357, 359, 365, 381, 383.
- FISH PONDS, valuable property, 367. Stocking, 391.
- FLANNEL, worn next the skin, 309.
- FLAX, water rotting, 14.
- FLIES, upon pictures, to prevent, 7. Fecundity of, 191.
- FLOUR, exports of, from the U. S. to Great Britain, 15. clover stalks, &c. ground into, for sheep, 198.
- FLOWER GARDEN, first prize essay, on horticulture, by D. Thomas, 339.
- FLOWER PLANTS, list of hardy ones for gardens 2, 11.
- FLOWERS, 28. Lines on, 55. To preserve, 76. Experiments on the color of, 191. Remarks on, 199. New compost for, 141. Utility of 181. Death of the, a poem, 294. Presented to the Editor of the N. Y. Commercial Advertiser, by Mrs. Parmenier, 375. Colors of, 403.
- FLY, weevil, observations concerning, from the transactions of the American Philosophical Society, 1. Preserving turnips from the, 61. Hessian, by Dr. J. E. Muse, 329.
- FOOT ROT, in sheep, 230.
- FOREST TREES, management of, 58.
- FOWLS, insects in 37. Fattening with potatoes, 87. Management of, 415.
- FOXES, owls, &c. destruction of, 390.
- FREDERICK SHEEP, letter from W. H. Freeman to R. K. Meade, and answer of the latter on, 81. Short-horn bull, Powell, 157.
- FREEMAN, W. H., letter to R. K. Meade, on his Frederick sheep, 81.
- FRESHET, in Pennsylvania, damage from, 159.
- FRONTON, garden of, 68.
- FR'ST, in May, 71.
- FRUIT, to preserve, 78. Fallen, should be gathered, 156. Insects, injurious to, 173. Different modes of keeping, 181. Supply of, in market, 223. How to keep, 246. Rocky Mountain, query and answer, 356. Stealing, 367.
- FRUITFULNESS, of plants, influence of climate on, 139.
- FRUIT TREES, trimming the roots of, before planting, 4. On renewing by seed, by N. Herbemont, 11, 15. Grafting, by Noah Webster, 28. Grafting on old branches, 28. Different modes in grafting, 51.
- Covering naked branches with new wood, 118. Inoculating or budding, 127. Management of, 181. Amelioration of, 198. Chinese mode of propagating, 141. To preserve varieties, 142. Propagating, by grafting, 150. Diseases of, in America, 165. New mode of propagating, 174. Planting on poor soils, 228. Canker in, 334. Watering with soap suds, 335. On the means of inducing fertility in, 349. Culture of, 365. The buds of, injured by frost, by D. T. 405.
- G.**
- GAMA GRASS, notice of, by Agricola, 50. Editorial notice of, 55. James Magoffin on, 143, 213.
- GARDEN, of Fromont, notice of, 68. Experimental, report on, by the Mass. Hort. Soc. 124, 127. Large Product of a, 414.
- GARDENS, remarks on, 76. In Europe, by J. C. Loudon, 188.
- GEMINATE, error in printing it, 359.
- GENERAL AGRICULTURAL AND HORTICULTURAL ESTABLISHMENT, prospectus of, 368.
- GILPIN, J. P. sends stalks of a new grass to the Editor, 167.
- GINSENG, plentiful in Western Virginia, 316.
- GIVING, we should give cheerfully, 95.
- GOLD, original deposit discovered in Mecklenburg Co. N. C. 55. Assay on foreign, 78.
- GOOSEBERRIES, presented by Isaac M'Kim, Esq. 127. Inquiry as to the culture of, 199. Culture of, by W. R. Prince, 220. Succession of fine flavoured, 229. Mr. M'Kim's mode of cultivating, 247. Curious names of, 263.
- GOOSEBERRY BUSHES, on the top of a tree, 391. Cut off the buds below ground, 308.
- GOSLINS, thunder fatal to, 78. Reports of cannon fatal to, 102.
- GOURD, American, large one, 287.
- GRAFTING, 28. Different modes of, 51. On grafting on foreign vines, by N. Herbemont, 291.
- GRAIN, to preserve from insects and mice, 100. On raising on light soils, 282.
- GRAPES, bad setting of some sorts, cause and cure of, 20. New varieties and seed of, 71. Error as to origin of Herbemont's Madeira, 101. Fine ones in market, 223. Succession of fruit, 237. American, by A. Culture of, by N. Herbemont, 252.—Husk of, used for tanning, 254. Rot and grafting on foreign vines, by N. Herbemont, 291. Culture of, 292. To keep fresh, 293. Cultivation of, 334. American, varieties of, 387. The Isabella, origin of, by W. R. Prince, 387. The "Cook," &c. 396.
- GRAPE SEED, received for distribution, 359, 383.
- GRAPE VINE, great produce of Willis', 88. Culture of, by C. Roudet, 243. From the Rocky Mountains, inquiry, 365. Buds of, injured by frost, 381, 396.
- GRASS, stalks of a new kind sent to the Editor, 167. Another, 176. Kinds suitable for various soils, 219.
- GRASS GROUNDS, should be manured, 300.
- GRASS LANDS, laying down, 188. Management of, 378.
- GREEN CROPS, turning in for manure, 65.
- GREEN GAGE, plum, correction of error in, and description of, 195.
- GREEN HOUSES, heating with hot water, 307, 325, 367.
- GREEN MANURE, improvement effected by, 130, 239.
- GRIFFITH, Mrs. M. offers Charlieshope for sale, 159.
- GUN, new constructed one, 286.
- GYPSUM, utility of, 51.
- H.**
- HARDEN, Dr. R. R. on bots in horses, 302, 349.
- HARRISON, Gen. W. H. address before the Hamilton county Agricultural Society, 162, 169.
- HARVEST, abundant, 128. Unfavorable, 135. More favorable, 144, 159.
- HARVEST HOME, celebration of in Pennsylvania, 174.
- HARVESTING GRAIN, remarks on—use of spirits, &c. 154.
- HATS, palm leaf, 87.
- HAWKS, FOXES, &c. destruction of, 390.
- HAWTHORN, Indian, 60. Common or white, 60.
- HAY grass should be turned daily, 148.
- HAZZARD, W. W. management of his plantation, 159.
- HEAVES, in horses, recipe for, 87.

INDEX.

HEDGE, Holly recommended for, 60.
HERBEMONT, N. corrects error as to origin of the Herbemont Madeira grape, 101. On the culture of the grape, 252. On the rot in grapes, and grafting on foreign vines, 291.
HERBEMONT'S MADEIRA grape, error as to its origin corrected, by N. Herbemont, 101, 103. By W. R. Prince, 156.
HEMP, on raising and dressing, 9. Society for encouraging the culture of, 111. Culture and crop of, in Massachusetts, 235.
HESSIAN FLY, remarks on, 149, 169. By Dr. J. E. Muse, 329. Editorial, 335. By a Talbot Farmer, 386. By An Ancient, 403.
HINTS, to farmers, relative to timber, 95. And receipts, in domestic affairs, 231, 238.
HOGS, French mode of cleaning, by T. B. Skinner, 37. Killing in Cincinnati, 54. Large one, 86. Fattening with boiled food, 94. Weight of Dr. Rowell's, 95. Economy in fattening, 278. Large ones, 278. Fattening with corn, 308. In Cincinnati, 327.
HOFWYLL, agriculture of, 235.
HOLLY, description and timber of, 60.
HONEY, made by a swarm of bees, 127.
HONEY LOCUST, inquiry about, 304.
HORIZONTAL PLOUGHING, by De Rustica, 43. By a Highlander, 114.
HORSES, sales of, 47. Recipe for heaves in, 87. Remarkable conduct of one, 135. On the use of, by President Madison, 153. Slobbering, 158. Treatise on, from the Library of Useful Knowledge, 181, 189, 197, 205. Sketches of, 318. Principles of breeding the, by R. J. B., 220. Disease among, in Massachusetts, 246. Bots in, by Dr. R. R. Harden, 302, 349. By Agriculturist, 317. Editorial, 319. By L. Chapin, 342. Genesee Farmer, 351. By Agriculturist, 358. By the Editor, 359. Disease in, 372, 378. Bots in, by Peter Ellis, 388. By A Spartan, 397. By the Editor, 398. Cough in, slaked lime useful for, 398. Treatment of, 414.
HORTICULTURAL BALL, in New York, 295.
HORTICULTURAL SOCIETY, proceedings of the Massachusetts, 19. Letter to the Albany, by Alexander Walsh, 20. Proceedings of the Massachusetts, 44. Minutes of the Pennsylvania, 45. Notice of the Massachusetts, 47. Exhibition of the Pennsylvania Society, 103, 111. Recommended in Maryland, 111. Exhibition of the Rensselaer Co. 118. Proposed one, 144. Proceedings of the Charleston, 203. Exhibition of the New York, 213. Festival of the Massachusetts, 237, 244. Address before the Albany, 301. Proceedings of the Massachusetts, on heating hot houses with water, 307. Premiums offered by the Pennsylvania, 397.
HOT WATER, heating green houses with, 307, 325, 367.
HOUSE-KEEPING, true economy of, 287.
HOVEN, in cattle, 124.
HUNTER, description, management, &c. of the, 205.
HYACINTHS, culture of, 230.
HYDROPHOBIA, cure for, 190.

I.

ICE HOUSES, construction of, 286.
IMPLEMENT, advertisers of, should state prices, 95.
IMPROVED STOCK, Ed. 31.
IMPROVEMENT, of worn out land, information on, solicited, 7. Of agriculture, apathy in relation to, 26, 412.
INDIAN CORN, culture of, 89. Culture of, 75. Culture of, by De Rustica, 82. By a farmer of Louisa, 83, 97. Large kind unprofitable, 217.
INDIGO, cultivation of, in Florida, 311.
INFANCY, passions of, 70.
INOCULATION, or budding, method of, 127.
INSECTS, in Fowls, 37. Destructive to peaches, 172. Injurious to fruit, 178. In mignonette, 181. On fruit trees, the time to destroy, 214.
INVENTIONS, American, notice of, 279.
ISABELLA GRAPE, origin of, by W. R. Prince, 387.

J.

JASMINE, yellow, flowers poisonous, 55.

L.

LABOUR AND STUDY, union of, 6.
LAND, worn out, information on improving solicited, 7. Liming, 22. On the choice of, 331. Improving exhausted, 377.

LAMBS, worms in, cause of disease, 61.
LAMPAS, in horses, 77.
LANCASTER COUNTY, Pa., manufactures of, 159. "LANCASTER MISCELLANY," notice of, 415.
LEASES, of farms for one year, 135.
LEAVES FOR MANURE, 108.
LEGHORN WHEAT, experiments with, 10.
LEMON, germination of seed within, 173. Nothing new, 184.
LIGHT SOILS, raising grain on, 282.
LILIES, description of, 19.
LIME, advantages and management of, as manure, 106, 210, 320. On the general principles and management of, 346. By C. Minor, 386. Application of, 404.
LIMING LAND, 22.
LINCOLN, Governor, on a stock farm near Boston, 15.
LINDLEY, George, notice of his Guide to the orchard and kitchen garden, 307.
LINNAEAN GARDEN, Prince's, at Flushing, visited by Prince Paul of Wurttemburg, 112. Notice of, 255.
LIVE FENCES, on the honey locust, buckthorn, &c. 293.
LIVE OAK, in Florida, by Col. White, 375.
LIVE STOCK, weekly market for, 51.
LUCERNE, remarks on the culture of, 75. Experiments with, 76. Its culture, 378.
LUPULIN, the powder of the hop, 70.

M.

MACHINE, for threshing grain, shelling corn, &c., 100. For weighing grain, 319.
MACHINERY AND CAPITAL, amount of, 387.
MACLURA, description of, from Prince's Treatise, on horticulture, 253.
MANGEL WURZEL, premium for a crop of; culture and produce of an acre of, 18.
MANILLA HEMP, by Dr. James Mease, 273.
MANURES, by F. A. Ismar, 57, 73, 89, 97. Green crops for, 65. Management of cowpeas, on cotton land, 99. Lime, 106. Leaves for, 108. Cotton seed and stable, 113. Bone, 129. Green, 130. Offals of the kitchen, 155. Manures, 210. Experiments in marsh mud, &c., 185. Marsh mud, seaware, &c., 201, 226, 249.
MANURING, large farms, 246.
MAPLE SUGAR, made in Vermont, 11.
MARSH MUD, seaware, &c., as manure, 201, 207, 249.
MEADE, R. K., on his Frederick sheep, 81. On improved short-horn cattle, 122. His bull Rowell, 137. On the Feilenberg system, 161. Remarks on sheep, 180. Extracts of letters relative to his Frederick sheep, 209. Remarks on the improvement of sheep, 267. On worn out land, first prize essay, 393, 401, 409.
MEASE, Dr. James, on the materials of cordage, 273.
MEAT, to salt, in summer, 238.
MELONS, culture of, 156.
METHEGLIN, how to make, 246.
MICE, cheap method of catching, 335. Immense number of, 359.

PARTRIDGES, scarcity of, 288.
PASSIONS, of infancy, 70.
PASTURE LAND, to destroy moss on, 378.
PEACH, natural history and varieties of, 218. Varieties of, from Prince's Pomological Manual, 236, 245. Budding on the Apricot, 135. Enlarged by ringing, 214. Fine ones this season, 339. Remarks on, by D. T., 328.
PEACH GRUB, remarks on a remedy for, 93.
PEACH STONES, planting, 315.
PEACH TREES, pruning, 13. And Pear, preserving of, at Specutia farm, 86. Injurious effects of ants on, 165. Insects destructive to, from Say's Entomology, 172. Do best on grass land, 205. To preserve, 246. And grape vines, injury to the buds, by frost, 381. By D. T., 405.
PEARS AND APPLES, fruit of some new seedlings, from J. B. Garber, 200.
PEAR TREES, cultivation of, on apple tree stocks, 52. Remedy for blight in, 278.
PEARS, notice of Jacobs', 237. Mr. Knight's new ones, 260. Culture of, and varieties, 308. Inquiry concerning, by D. T., 388.
PEAS, sowing too close, straight rows, 21. Green, and cucumbers in October, 246. On raising early crops of, 268. Beans, &c., why they boil hard, and how to obviate it, 404. Cow, mode of culture in S. C., 100. Culture and varieties of, 414.
PEPPER, to powder red, by Cousin Tabitha, 351.
PERRY, how to make, 182.
PHYSIOLOGY, vegetable and animal, 134.
PIGS, large ones, 323.
FINE, nut bearing, seeds of, sent by Commodore Porter to J. S. Skinner, 167.
PINES, native, sent to England by W. R. Prince, 372.
PLANARIA TORVA, notice of, 71.
PLANTATION, general management of a, 138.
PLANTING, fruit trees, to trim the roots, 4. Vines in yards, 78. Fruit trees, &c. on poor soils, 228. In general, 265, 276, 282, 289. Of forest trees, 293, 297, 305, 315, 332, 347, 354.
PLANT LOUSE, remarks on, 93.

INDEX.

- PLANTS**, list of hardy perennial, for borders, &c., 2.
 11. Decay and death of, 172. Acclimating principle of, 247. Food of, 283. Of Mexico, 292.
 Brazilian introduced at St. Petersburg, 308.
PLASTER OF PARIS, utility and history of, 51.
PLough, Thatcher's improved, 155.
PLoughing, by De Rustica, 25. Horizontal, by do.
 45. Deep, by do., 65. Horizontal, 114. Hill-side and horizontal, information of requested, 176.
PLUM, osage, enquiry, 356.
POLITENESS IN CHILDREN, how to induce, 175.
POMEGRANATE, notice of, as ornamental shrubs, 173.
PORE, pickle for, 309. Increase per day in fattening, 406.
PORTER, Commodore, letter from, on seeds of the nut pine, silk, &c., 487. Communicates a treatise on silk in Spain, 238.
POSTS, durability of, 67.
POTATO, sweet, culture of, 363.
POTATO CHEESE, mode of making, 264.
POTATOES, economical method of raising early, 2. Of keeping, 10. New in March, 76. For soap, 78. Sweet, 80. No crop so neglected as, and different kinds of, 99. Value of as food, and history of, 114. Starch of, 134. Large ones, 271, 288. And large crop, 371.
POULTRY, management of, 29. Different varieties of, 269. Diseases of, 375.
PREMIUMS, offered for essays, 7. Decision on, deferred, 167. Remarks on, 184. Award of, 343. Offered by the Pennsylvania Horticultural Society, 397.
PRINCE, W. R. on Herbemont's Madeira grape, 156. On the culture of gooseberries, 220. Sends acorns, &c. to England, 371. On the Isabella grape, 387. On mulberry trees, 413.
PRINCE, W., & Son's nursery at Flushing, notice of, 255. W. R. sends acorns, &c. to England, 371.
PRINCIPLES, of breeding the horse, by R. J. B., 220.
PRIZE ESSAYS, 1st Horticultural, by D. Thomas, 339. 2d Agricultural, by John Stillwell, 337. 3d Agricultural, by Gideon Davis, 369. 2d Horticultural, by J. C. Short, 279. 1st Agricultural, by R. K. Meade, 393, 401, 408.
PRODUCE, from 40 rods of land, 278.
PROPAGATION, of fruit trees, new mode of, 174.
PROSPECTS, of American farmers, 55.
PRUNING, peach trees, 13. Practical hints on, 342.
PUDDING, made of green corn, 254.
PUMPKINS neglect of cultivating, 76. Making bread of, 309. Extraordinary produce of a vine, 280. Do. 278.
PUSHEE, the plantation, management of, 145.
PYRUS MALUS BRENTFORDIENSIS, notice of, 308.
- Q.**
- QUINOA**, Chenopodium, the seed of, received by the Editor, 92. Quality and cultivation of, 78. Further notice of, 111, 175, 280. Culture and use of, 275.
- R.**
- RABBITS**, in Europe, different kinds of, 85.
RAIL ROAD, performances on the Liverpool and Manchester, 47. Report on, 62. Winchester and Harper's Ferry, Judge Tucker's address on, 61. Fifth Annual Report of the Baltimore and Ohio, 261. Hudson and Mohawk, 279. Baltimore and Ohio, 303. Liverpool and Manchester, 335.
RAPP, Frederick, presents specimen of silk made at Economy, 237.
RAVENEL, Henry, management of his plantation, 145.
RECEIPTS, and hints, in domestic affairs, 231, 233.
RHODODENDRON, poncticum, description of, 264.
RICE, account of the wild, 10. Annual exhibition of product of, 31. Seed of the wild, 39. Culture, by W. B. M. and Jordan Myrick, 105.
RICE BREAD, how to make, 250.
RINGBONE, in horses, treatment of, 378.
RINGING, peaches enlarged by, 214.
ROCK, method of splitting, in China, 71.
ROOTS, of fruit trees, to trim before planting, 4. How to preserve, 270.
ROSE, myrophila, notice of, 173. Cherokee, culture of, as a hedge plant, by S. Elliott, 356.
ROSE BUGS, 28.
ROT, foot, in sheep, 230. Rot in, 238. In grapes, by N. Herbemont, 281.
- ROTATION**, of crops, in England, 178, 295.
RTA BAGA, on the culture of, Ed., and by D. T., 15. Premium for, 18. Culture of, 404.
RYE, to preserve from insects and mice, 100.
- S.**
- SALT**, a remedy for the wail in wheat, 180. For worms, slugs, &c., 227.
SALT-PETRE ON BEEF, remarks on, 150.
SAMPSON, and his stock, 219.
SANA, or sun plant, its use in cordage, by Dr. James Mease, 275.
SAUER KHOUT, how to make, by Cousin Tabitha, 327.
SAW MILL, newly invented one, 166.

INDEX.

VEGETABLES, new, gentlemen of the navy solicited to obtain, 79. Physiology of, 134. Curious, 295.

VINELLO, recipe for making, 151.

VINES, should be planted in yards, 76. Culture of,

extracted from "Our Neighbourhood," 131.—

Hampton Court vine, 142. Insects injurious to, 173.

Grape, stopping from bleeding, 308. Plantation and cultivation of, 334, 343. Injury to the buds from frost, 381. Answer, by John Willis, 404.

VINEYARD, Loubat's, notice of, 220. Columella on,

236. Culture of, by C. Roudet, 243.

W.

WATCHING, the swarming of bees, 158. The weather, 86.

WALNUTS, how to pickle, 158. Native, sent to England by W. R. Prince, 371.

WATER ROTTING FLAX, 14.

WATER, Tartars' method of drawing, 102. Remedy for bad, 190.

WEEDS, advantage of destroying, 106.

WEATHER, on watching the, 86. And the harvest, 135.

WEIGHING MACHINE, extraordinary one, 319.

WELLS, Tartars' method of drawing water from, 102.

Damps in, 183.

WESTERN LANDS, cultivation of, 370.

WEVIL, observations concerning, 1. Natural history of, 5, 67. In wheat, 74, 130. To prevent its depredations, 139. Salt a preventive of, 180.

WHEAT, Leghorn, experiments with, 10. White flint and red bald, 11. To prevent smut, 22. Cultivation of, in Ohio, 50. On the preservation of, from the weevil, 1. Wevil in, 74. Reaping, 90. Productive white, 203. Culture of, 371. On its turning to cheat or chess, by D. T., 130. Solid stem, 149.

New varieties of, 259. Winter, &c., 318. Turning to cheat, 327, 337, 343, 388, 391, 395.

WHITE BEAM, description of, 60.

WHY AND BECAUSE, useful memoranda, 294.

WILD SERVICE, description of, 60.

WILD RICE, account of, 10.

WILLIS' GRAPE VINE, produce of, 68.

WINCHESTER AND HARPER'S FERRY RAIL ROAD, notice of Judge Tucker's address on, 61.

WINE, recipe for making vinello, 133. Domestic made in Georgia, 153. To make currant wine, 142. Oliver Phelps' mode, Adlum's do., 143. S. W. Pomeroy's, 167. Domestic, 269. Adulteration of, 326. Domestic, in Pennsylvania, 343.

Making of, 356. Presented by N. Herbenon; 385. Making, 389.

WINTER BUTTER, method of making, 77.

WINTER MELON, exhibited by J. D. Legare at Charleston, 280.

WOOD, high price of, in Cincinnati, 309.

WOODLANDS, management of, 58.
